INQUISITIVE

A leading organization wants to explore better ways to meet market demands. Work closely with their partners and customer using innovative methods and techniques. The driving objectives for this system are: An online survey tool to capture voice of market, Central storage helps in analyzing for the future strategy, Various views available to view data**.** A survey is a way to gather knowledge a few specific topics, usually in an exceedingly confidential manner. In existing system, the survey review reports are viewed manually. In this paper, survey acts as a measuring tool and provides invaluable insight on employee loyalty, job satisfaction, and employee morale. Here we allow the customers to take a survey test, and this results provides the status of the company in the form of graphical representation.(bar chat and pie-chart).
